NOVE INDUSTRIJSKE PARKE

Sky-high vacancy rates

Of the almost 400,000 postal addresses in Detroit in 2009, about 20% are unoccupied

How the map was created

Vacancy rates for each census tract were calculated using all residential and business addresses unoccupied for 90 days or more, as well as addresses in buildings that are considered abandoned or under construction and not ready to be occupied

TIME Graphic by Andr ea Ford and Lon Tweeten

Sources: U.S. Census Bureau; U.S. Postal Service; Department of Housing and Urban Development; Wayne State University Center for Urban Studies

POLOŽAJ JEKLARN V SLOVENJI?

TRADICIONALNA INDUSTRIJSKA PANOJA (Historic Industry)

LOGGING, WOOD PROCESSING

Lesna industrija v Sloveniji

lesna zaloga
327.275.671 m³

letni prirast
8.000.000 m³

število zaposlenih
